

**Amendments to the Specification:**

Please replace the paragraph beginning at page 13, line 30 and ending at the beginning of line 36 with the following rewritten paragraph:

B,  
N2  
--In addition to the low CTE WC-M composition embodiments discussed above, low CTE binder alloys of this invention can be used to prepare low CTE double-cemented tungsten carbide compositions. Referring to FIG. 5, as As used herein, the term "double-cemented tungsten carbide compositions" refers to WC-M compositions 18 that have a microstructure as illustrated in FIG. 4 5, whereby a first...--
